

Library Usage Analysis Report

This report analyzes daily library footfall over a 30-day period, focusing on overall usage, weekly trends, peak days, and unusual changes.

1. Key Findings

Analysis Area	Finding
Highest footfall	195 visitors — Day 29
Lowest footfall	120 visitors — Day 1
Overall trend	Clear upward trend throughout the month
Highest weekly average	Week 5 — 191.5 visitors/day
Lowest weekly average	Week 1 — 134.0 visitors/day
Peak usage days	Days 29, 26, 30, 24, and 28
Largest unusual drop	Day 21: 168 → 145 (23 fewer visitors)
Other notable drops	Day 14: 165 → 140; Day 27: 190 → 165
Largest increase	Day 8: 125 → 145 (20 more visitors)

2. Weekly Trend Analysis

Week	Days	Total Footfall	Average/Day	Trend
Week 1	Days 1–7	938	134.0	Starting level
Week 2	Days 8–14	1065	152.1	Increasing
Week 3	Days 15–21	1158	165.4	Increasing
Week 4	Days 22–28	1227	175.3	Increasing
Week 5	Days 29–30	383	191.5	Peak

3. Interpretation

Library usage increased consistently across the 30-day period. The weekly average rose from 134.0 visitors in Week 1 to 175.3 visitors in Week 4, reaching 191.5 visitors per day in the final two days. This indicates growing demand for library facilities and services.

The sharp declines on Days 14, 21, and 27 are notable deviations from the surrounding pattern. These changes may be associated with holidays, examinations, timetable differences, events, or other temporary factors and should be investigated using additional records.

4. Actionable Suggestions

1. Increase seating capacity and study-space availability during high-footfall periods.
2. Investigate the sudden drops on Days 14, 21, and 27 for possible operational or academic causes.
3. Increase staff availability during peak usage periods to improve service and crowd management.
4. Ensure sufficient popular books, computers, and other resources as demand continues to rise.
5. Continue collecting footfall data for several months and analyze weekday/weekend patterns to improve forecasting and resource planning.

Prepared as a data-analysis report based on the 30-day library footfall record.
